AIR NEW ZEALAND's DC-8's link New Zealand and the South Pacific with Australia, the Orient and North America. Their powerful fanjet engines and luxury interiors ensure superb comfort. The symbol on the tail fin is the Koru which had its place on the sternposts of questing Maori canoes that probed Pacific distances in another time.

N.Z.A.R.T. GOLDEN JUBILEE YEAR, 1976

Since 1902 the Radio Amateurs of New Zealand have played a vital role in the advancement of radio communications. By 1926 their number was sufficient to support a national Association, and on 16th August 1926 the New Zealand Association of Radio Transmitters was formed in Auckland.

The Golden Jubilee Conference of the Association will be held in Auckland from 4th to 7th June 1976 when many local and overseas amateurs will join in fellowship. The Association—N.Z.A.R.T.—now has over 3000 members with a wide variety of interests in the hobby.

Should you desire further information about Jubilee Conference 1976 please write to the Secretary, P.O. Box 23-680, Papatoetoe East, Auckland, New Zealand. Your letter will be appreciated.
